

**\*\*This document is intended to summarize the operations and transparency processes for the 2018 USBC Open Championships.\*\***

**1. WHO HAS ACCESS TO THE ACTUAL PATTERN DATA AND GRAPHS FOR THE TOURNAMENT?**

a. The pattern information is contained to the people listed below:

*i. All Pattern Information*

1. Chad Murphy, USBC Executive Director
2. Greg Moore, USBC Senior Director of Tournament Programming
3. Duane Hagen, USBC Open Championships Tournament Director
4. Gus Falgien, Kegel Vice President of Sales
5. Doug Dukes, Kegel Technical Sales Specialist
6. Nicholas Hoagland, USBC Pattern Development Team Lead

*ii. Pattern Distance and Volume Information / Checks Only (USBC Open Championships Only)*

1. Duane Hagen, USBC Open Championship Tournament Director
2. Frederick "Chip" Aki, USBC Open Championship Assistant Tournament Director
3. Brandy Silva, USBC Tournaments Specialist
4. Steven Kasel, MOD and Scale Room Supervisor Lead
5. Tyrone Burks, USBC Open Championships Lane Maintenance Supervisor
6. Bob Aleksinski, USBC Open Championships Assistant Lane Maintenance Lead

*iii. Volume Checks @ Bowlers Journal & Team Practice (Quality Assurance Volume Checks)*

1. Tyler Strickland, Bowlers Journal and Practice Supervisor
2. Robert Udseth, Bowlers Journal and Practice Lead
3. Brett Cunningham, Bowlers Journal and Practice Lead

*iv. Lane Tape Reading Data Only*

1. Danny Speranza, USBC Senior Director of Equipment Specifications
2. Dave Nestor, USBC Research Technician

**2. HOW WILL THE KNOWLEDGE OF THE TYPE OF LANE CONDITIONER(S)/CLEANER USED BE PROTECTED?**

a. Kegel will be affixing labels which do not disclose the type of conditioner(s) and cleaner being used.

**3. WILL THE "LANE TOPOGRAPHY GRAPHS" BE AVAILABLE FOR ALL COMPETITORS TO VIEW?**

a. Yes. Each lane has been leveled to all approved USBC specifications with a maximum tolerance of 0.020. The "Lane Topography Graph" of each lane will be available on [BOWL.com](http://BOWL.com) and on-site.

**4. WILL THERE BE TRANSPARENCY REGARDING THE LANE MAINTENANCE PROCESS FOR ALL COMPETITORS TO VIEW?**

a. Yes. The "Squad Verification Checklist Summary" will be available on [BOWL.com](http://BOWL.com) and on-site. Individual squad checklists available on request.

**5. DO THE SAME LANE MACHINES OIL THE SAME LANES EACH TIME? IS THERE A ROTATION?**

a. The tournament lane maintenance machines are rotated throughout the tournament venue, so that each machine oils a different portion of the venue throughout the day. A log of the usage of each machine is tracked and available as part of the Squad Verification Checklist. USBC reserves the right, depending on squad size, to utilize the same lane machines in the same section of the venue if warranted.

- 6. ARE THE SAME OIL PATTERNS BEING UTILIZED AT AMF STRIKE 'N SPARE LANES FOR THE TEAM PRACTICE SESSIONS AND BOWLERS JOURNAL CHAMPIONSHIP? WHAT SECURITY MEASURES ARE AVAILABLE TO BE SURE NO ONE IS ABLE TO VIEW THE PATTERN IN THE BOWLING CENTER?**
- a. The same exact patterns will be utilized at AMF Strike 'N Spare Lanes for team practice sessions (team event pattern) and for the Bowlers Journal Championships (doubles/singles pattern). As with the Open Championships venue, lane maintenance personnel will not be able to view any pattern data. After the final squad of practice and Bowlers Journal Championships each day, the tournament oil patterns will be removed from the lanes.
- 7. IS THE LANE SURFACE THE SAME AT AMF STRIKE 'N SPARE LANES AS COMPARED TO THE ONCENTER?**
- a. No. The lane surface at the Oncenter Convention Center is Brunswick Pro Anvilane (Generation 2) synthetic lanes. The lane surface at AMF Strike 'N Spare Lanes is AMF SPL synthetic lanes.
- 8. HOW DO THE PINS GET ROTATED? DO THE SAME PINS STAY IN THE MACHINES FOR THE DURATION OF THE TOURNAMENT?**
- a. The USBC Open Championships has a "Pin Rotation Schedule," which manages the usage of the pins throughout the course of the tournament to insure all competitors are provided similar ages of pins. All tournament pins are new to start and rotated in accordance with the pin rotation schedule.
- 9. HOW OFTEN IS THE PIN-SPOTTING REVIEWED, AND WHO REVIEWS THE PROCESS?**
- a. Pin-spotting is a critical component to a fair and equitable playing field for all competitors. The maintenance team at the USBC Open Championships and the tournament management collaborate on reviewing pin-spotting as designed in the pin-spotting review schedule.
- 10. WHAT IS THE PROCESS FOR TAKING TAPES FOR EACH SQUAD AND FOR EACH LANE MACHINE? HOW IS THE CONFIDENTIAL TAPE DATA GOING TO BE PROTECTED?**
- a. During the first squad of each event, of each day, tapes will be taken at 15 feet and 35 feet on one (1) lane with one (1) of the four (4) lane machines. For each subsequent oiling of each event, one (1) tape will be taken at 25 feet with another one (1) of the four (4) lane machines. The end result is that each lane machine will have a minimum of one (1) tape taken each day. One tape at 25 feet will be taken daily for the Bowlers Journal Championships and team practice sessions. Tapes will be labeled with date, machine, distance and squad. All tapes will be shipped and read at the International Bowling Campus. Tape graphs for specific squads will be available at the end of the tournament.
- 11. WHAT IS THE PROCESS FOR CHECKING OIL MACHINE VOLUMES AND KEEPING THE DATA FROM BEING RELEASED TO THE PUBLIC?**
- a. Volume checks for each pattern, with each machine, will be performed each morning by one of the individuals as listed above. No other staff, visitors or spectators will be allowed in the room during these volume checks. The results of the volume checks will be notated on the "Daily Inspection Checklist."
- 12. IS THERE AN AREA AT THE TOURNAMENT VENUE FOR THE LANE MACHINES TO BURN LANES? WHAT IS THE PROCESS FOR LANE BURNING THIS YEAR?**
- a. Yes, there is a "burn lane" to the left of lane 1 at the Oncenter Convention Center. All machines will "burn" their lanes before being taken to the tournament lanes. Lanes are burned in accordance with the previous squad completing their bowling and is notated on the "Squad Verification Checklist."

**13. HOW OFTEN ARE THE LANE MACHINES CLEANED? WHAT MAINTENANCE PROTOCOL IS IN PLACE?**

- a. Lane machines are cleaned, inspected and viewed before every squad at the USBC Open Championships. If there is a specific and imminent maintenance issue with a lane machine, it is immediately pulled from the oiling rotation until the problem can be rectified with 100% certainty. The Open Championships lane maintenance staff, Open Championships management and technicians from Kegel work in a collaborative effort to make sure all parties are trained to spot potential issues before they happen.

**14. WILL COMPETITORS BE ABLE TO SEE THE DISTANCE OF THE OIL PATTERNS BECAUSE OF THE WALKOUT PROCESS DURING THE TOURNAMENT?**

- a. No. There is no Center Aisle at the Oncenter Convention Center and no persons are authorized past the foul line for any reason without approval of USBC Open Championships staff.

**15. WHAT DOCUMENTS CAN I VIEW ONLINE AND ON-SITE? WHERE CAN I FIND THEM PRIOR TO BOWLING?**

- a. All of the below documents are available online at [BOWL.com](http://BOWL.com) and on-site at the Oncenter Convention Center:
  - i. Lane Topography Graph
  - ii. Squad Verification Checklist Summary
    - Individual squad checklists available on request
- b. All of the below documents will be available after the completion of the tournament
  - i. Oil pattern program sheets including volume, load data, ratio and distance
