

PBA MESSAGE ABOUT BALL HARDNESS CHECK AT U.S. OPEN

The PBA recognizes the USBC as the governing body of bowling with respect to rules and equipment specifications and supports the USBC's effort to conduct this urethane ball test at the US Open. The PBA encourages player participation in the check (this includes all of their urethane products whether being used in the U.S. Open or not) with the knowledge that results of this test may or may not affect the eligibility of a ball in future PBA competition.
